

Extended Learning at Dalhousie's Faculty of Agriculture is offering two online courses supporting pesticide certification and continuing education.

### **Online Pesticide Applicator CEP course**

At long last, we now have an online course option for pesticide continuing education. The **Online Pesticide Applicator CEP course** is available now and is worth **6 CEP points** if all requirements are met. This is a fully online course that the participant may complete at their own speed and on their own schedule. **Participants MUST have a valid (current) pesticide applicator's license in either agriculture or landscape to qualify for the allotted 6 points.**

### **Point Breakdown**

The point breakdown by topic is as follows:

- 1.5 points for Application Technology
- 1.0 point for Environment
- 1.0 point for Human Health & Safety
- 1.0 point for Labeling
- 1.5 points for Pest Management

### **Course Requirements**

To acquire full points for the course, participants must work through the course content in the above areas and complete the respective quizzes with a grade of 70% or higher. CEP receipts will be issued when participants have completed the course, including all quizzes.

### **Online Registration**

UNIVERSITY**

FACULTY OF AGRICULTURE

### **Online Pesticide Applicator Exam Preparation course**

If you are seeking certification for the first time, or if your pesticide applicator's license has lapsed and you are required to take the NS Environment exam to become certified again, the **Online Pesticide Applicator Exam Preparation course** may be helpful to you. This course is intended to support those seeking **agriculture or landscape** class certification. This is a fully online course that the participant may complete at their own speed and on their own schedule. Please note that this course DOES NOT include the NS Environment exam itself. More information about registering for the online exam can be found here: <https://www.novascotia.ca/nse/pests/docs/Pesticide-exam-schedule.pdf>
