

Equipment Technician / Mechanic

Location: Granite Springs Golf Club

Position Type: Full-Time, Year-Round

Position Overview

Granite Springs Golf Course is seeking a skilled and motivated **Equipment Technician / Mechanic**. You will be the person who keeps everything moving: the mowing fleet, utility vehicles, and our golf cart fleet. Working closely with the Golf Course Superintendent, you will manage the shop, set the maintenance schedule, and make the calls on repairs, parts, and priorities. This is not a “wait for something to break” job. We are looking for someone who runs a proactive preventative maintenance program and takes pride in a fleet that is dialled in.

What you'll do:

- Perform preventative maintenance, diagnostics, and repairs on all turf equipment – reel and rotary movers, sprayers, aerators, tractors, utility vehicles, and small engines
- Maintain and repair the golf cart fleet, including electrical systems, batteries, chargers, and drivetrain components
- Grind, sharpen, and set reels and bedknives to precise height-of-cut specifications
- Build and manage a preventative maintenance schedule with accurate service records for every unit
- Manage parts inventory, source components, and coordinate with vendors and suppliers
- Keep the maintenance shop clean, organized, and safe, including proper handling and disposal of fluids and hazardous materials
- Train seasonal staff on safe equipment operation and daily checks
- Work with the Superintendent on repair-versus-replace decisions and capital equipment planning

Desired Experience – What you bring

Required

- Demonstrated experience as a mechanic or equipment technician — turf, automotive, marine, small engine, or heavy equipment backgrounds are all welcome
- Solid mechanical, hydraulic, and electrical diagnostic skills
- Comfort working with both gas and electric/battery-powered equipment
- Your own hand tools (the shop provides specialty and grinding equipment)
- Valid Nova Scotia driver's licence
- Ability to work independently, prioritize on the fly, and communicate clearly with the turf crew

Nice to Have

- Experience with turf equipment brands such as Toro, John Deere, Jacobsen, or Ventrac
- Reel grinding experience (Foley, Bernhard, or similar)
- Golf cart fleet experience (Club Car, E-Z-GO, Yamaha)
- Certified Technician designation, Red Seal, or equivalent trade certification
- Welding and fabrication skills
- WHMIS and pesticide handling certification

Compensation and Perks

What we offer

- \$60,000 – \$70,000 annually, with the starting rate set by your experience and skill level
- Full-time, permanent position
- Health and dental benefits
- Golf privileges and staff pricing on merchandise
- A well-equipped shop and real ownership over how it runs
- A small, supportive team where your work is visible every single day

Additional Details

Schedule

Full-time hours. Early starts are the norm during the golf season (April through November), with some weekend and holiday coverage required during peak periods. Winter months focus on the off-season overhaul program with a more regular schedule

How to Apply

Send your resume to gmgranitesprings@granitespringsgolf.com with the subject line “Equipment Technician.” Please include a short note on the equipment you have worked with and where you are strongest.

Applications are reviewed as they arrive, and we would like the right person in place by August 15, 2026.
